## Most in-demand blockchain jobs

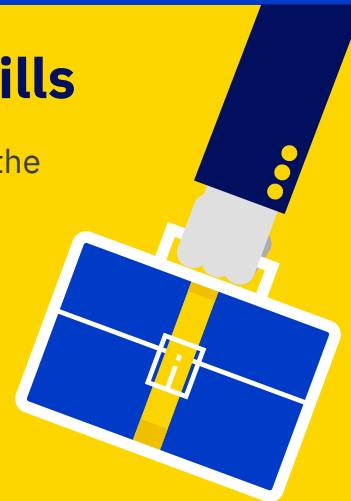

**Blockchain developer:** Develop and optimize blockchain protocol, and smart contracts and web apps using blockchain technology.

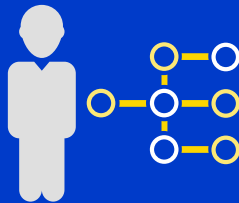

## Blockchain skills

LinkedIn says these are the top skills for blockchain developers:

- + Solidity
- + Ethereum
- + Cryptocurrency
- + Node.js

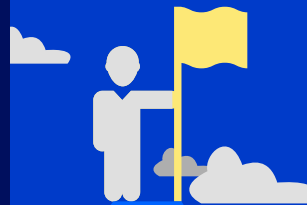

**Blockchain architect:** Create technical solution architecture and know the technical capabilities of blockchain.

## But what else?

Of course you need to understand blockchain technology and security, but it also helps to have business acumen and be T-shaped—thinking outside and across other disciplines!

**Business sales and delivery:** Identify and develop opportunities for building and maintaining relationships, account strategy, and pull the blockchain team together.
